

Types of CSS

There are 3 Types of CSS:

- Inline CSS
- Internal CSS
- External CSS

Inline CSS:

Inline CSS involves applying styles directly to individual HTML elements using the style attribute.

```
</head>  
<body style="color: white; background-color: green;">  
  <center>
```

Internal CSS:

It applies styles to specified HTML elements, The CSS rule set should be within the HTML file in the head section, The CSS is embedded within the <style> tag inside the head section of the HTML file.

```
<head>  
  <title>Document</title>  
  <style>  
    h1{  
      color: white;  
    }  
  </style>  
</head>
```

External CSS

It contains separate CSS files that contain only style properties with the help of tag attributes, CSS property is written in a separate file with a .css extension and should be linked to the HTML document using a **link** tag.

```
<title>Document</title>
</head>
<link rel="stylesheet" href="style.css">
<body>
  <div class="container">
```

```
# style.css  X
# style.css >  .container12
1  *{
2      margin:0px;
3      padding:0px;
4      box-sizing: border-box;
5      color: #c3610c;
6  }
7  .container{
8      width:100%;
9      height:1000px;
10     display: flex;
11     flex-direction: row;
12 }
13 .container1{
14     margin-right: 5px;
15     width:50%;
16     height:1000px;
17     display:flex;
18     flex-direction: column;
19 }
20 .container11{
21     margin-bottom: 5px;
```
